SUMMARY

An experienced, detail oriented Web Developer focused on delivering elegant, user-friendly solutions by utilizing a variety of technologies and frameworks. Skilled at translating designs into code that functions responsively between desktops and mobile devices on all modern browsers.

CORPORATE EXPERIENCE

magicJack for BUSINESS, Alpharetta, GA — Web Developer

Provides VoIP phone services for small to medium size businesses.
October 2016 - May 2020

Worked on a dispersed team of developers and designers to help code and maintain the company's web properties which included a marketing website (Jekyll), a customer portal (React), an e-commerce site (React), a quote site (React), a desktop app (React), company emails (Foundation for Emails) and landing pages (Jekyll).

Converted designs into responsive, mobile-friendly interfaces optimized for speed and performance on modern browsers.

Analyzed requirements, implemented the build system and coded all of the company's emails to be deployed on multiple platforms.

Responsive Web Design, HTML, CSS, React, Javascript, jQuery, Jekyll, Liquid, Gulp, GitHub, Bootstrap, Scss, Illustrator, Photoshop, Browser Testing, Styled-Components, Foundation for Emails.
